About me

I am an ardent storyteller. I love designing story archs, characters, fictional worlds, plots and creative ways of storytelling through digital games. My area of expertise lies in player experience design. I constantly engage in research aimed at exploring new means to achieve player immersion by unifying the design processes of the gameplay and the narrative. I am actively looking for a full time narrative design job role.

Professional Experience

Story Writer

Videogyan Studios Private Limited, Bengaluru

I was tasked with concept creation, character design, art design, design documentation, script writing and design analysis.
